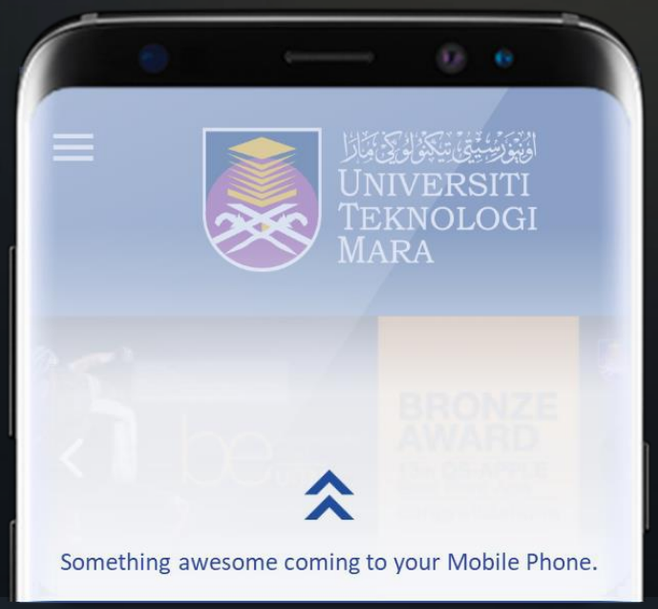
UNIVERSITI TEKNOLOGI MARA

UiTM Digital Campus

UiTM Mobile Apps for University Staff and Students

Something is about to Transform.



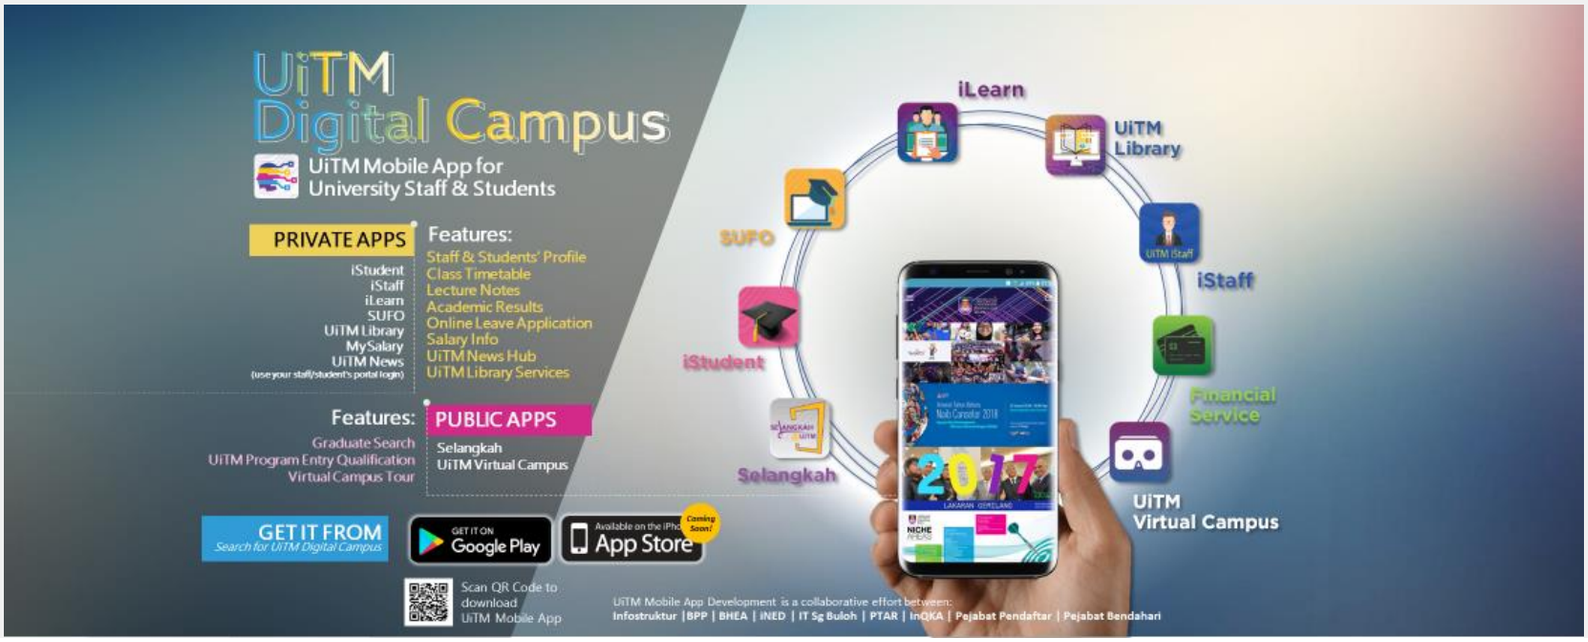
This campaign is broadcasted in support of UiTM Digital Campus Initiative.

About
UiTM Digital Campus

Digital access in education and university services has led to mobility and borderless information. In order to remain competitive, the need for embracing and inseminating digital culture is a must. This is supported by one of the University initiatives which is to provide a new platform for UiTM's community to fully utilize the technology in teaching, learning, research and services.

Mobile Applications initiative played an important role for **UiTM Digital Campus** project. This initiative includes integrating with a highly convenience-oriented feature, QR Code; which can be read by imaging devices which are readily available especially within our gadgets. It leads to an easy accessibility to variety of services. Diversity of services can be widely ranged from academic to administration such as iStudent, iStaff, Library services etc. It is a new level of user experience with easy access and less hassle.

Digital Year for 2018 has been the main focus for UiTM. It represents an essential opportunity to explore how changing of mind-set with new digital applications can be a game changer; ensuring the readiness to compete and excel in the contemporary digital environment. **"Innovation and sustainability drive global excellence"** is this year digital theme, is significantly in-line with the mobile application initiative and will drive UiTM towards global excellence.



Mobile Apps Requirement

UiTM Digital Campus App is a **type of application software designed to run on a mobile device,** such as a smartphone or tablet computer. Its intention to **provide users with similar services to those accessed on PCs.** This app are **generally small with limited function** and **available offline** that can be accessed from mobile device after being install. It make use of **web services** and **mobile device features** such as camera, location services, etc. Today most of Digital Campus apps can be access from mobile device either from Android or iOS platform.
